SUMMARY

Full Stack Engineer (5+ years) specializing in **Web Architecture** and high-performance applications. Expert in shipping AI-powered features and orchestrating scalable systems using **TypeScript (React), Next.js, PostgreSQL, and Kubernetes**.

WORK EXPERIENCE

Software Engineer Intern | PartyMonster Games

Jan 2026 – Present

- Designed real-time **WebSocket synchronization** with **Colyseus** for multi-device platforms (TV, Mobile), ensuring low-latency state management for [Trivia Party](#) and [WordRush Party](#) – top-10 ranked Fire TV apps with 10K+ monthly downloads.
- Led end-to-end **web app development** including **RESTful API development, backend logic, and frontend UI**; leveraged **React, TypeScript, Node.js, and PostgreSQL** to drive a 30% MoM increase in MRR within the first month of launch.
- Collaborated directly with the founder to engineer **automated tests** and configured **GitHub Actions** to streamline deployment pipelines, ensuring high code quality and stable releases in a fast-paced startup environment.

Member of Technical Staff | Taipei City Government

Sep 2019 – July 2024

- Led a 3-person cross-functional team to optimize a central web app, ensuring **data integrity across SQL (MySQL) and NoSQL (MongoDB) backends** for 1,000+ daily users.
- Engineered Python geospatial algorithms for **real-time data analytics**, improving point accuracy and reducing manual calculation time by 12%

Graduate Research Assistant (Machine Learning) | National Taiwan University

July 2017 – June 2019

- Developed a **machine learning Python pipeline** for hyperspectral image classification and published a peer-reviewed IEEE paper on spatial-spectral data modeling and optimization [[Link1](#)][[Link2](#)].

EDUCATION

San Francisco Bay University

2024 – 2026

M.S. in Computer Science, **Specialization in Web Programming and Data Modeling** – GPA : 3.9/4.0

National Taiwan University

2017 – 2019

M.S. in Civil Engineering, **Specialization in Image Processing** – GPA CS-related Class: 4.0/4.0

- Thesis: Hyperspectral Image Classification via Integration of Joint Sparse Representation with Spectral and Spatial Information [[Link](#)]

National Chengchi University

2013 – 2017

B.A. in Land Economics (Minor in English) – GPA: 3.73/4.0

PROJECTS

y2k-flying-bananas (3D Flying Banana Bot) – [[Live Demo](#)][[GitHub](#)]

Jan 2026 – Feb 2026

- Optimized web performance and asset rendering** for a Y2K-styled 3D application built with Next.js and React Three Fiber (R3F) and , achieving high **Core Web Vitals** scores for physics-based environments and an interactive chatbot.

Foodie Diary (AI Calories tracking app) – [[Live Demo](#)][[GitHub](#)]

July 2025 – Feb 2026

- Built a React, TypeScript meal tracker that transforms multimodal AI analysis into **interactive nutritional data visualizations** and actionable health trends.

AI Newsreader & Journalist – [[Summary](#)][[GitHub](#)]

Aug 2025 – Dec 2025

- Built a cloud-native AI news-to-video app using **React, Node.js, and GCP**; integrated **HeyGen AI** to automate report generation and deployed microservices on **Google Kubernetes Engine (GKE)** with HPA.

SKILLS & COURSES

Languages: Python, JavaScript (ES6+), TypeScript, SQL, HTML/CSS; Familiar: Java.

Frameworks & Tools: React, Next.js, Node.js, GitHub Actions, PostgreSQL, NoSQL (MongoDB), GCP, Docker, Kubernetes.

Coursework: Cloud Computing, Software QA & Test Automation, Data Modeling, and Advanced Web Programming.
