SUMMARY

Full-stack Software Engineer with 5+ years of experience building real-time **multiplayer systems**, **consumer-facing web and TV applications**, and **scalable backend services**. Expert in React, TypeScript, Node.js, and **automated CI/CD pipelines**.

WORK EXPERIENCE

Software Engineer | Party Monster Games

July 2026 – Present

- **Partnered directly with the Founder** to turn specs into production architecture for Doodle Party and Emoji Party, leading code reviews; overhauled the TV Hub Menu with prefetching and caching to cut load time.
- Fixed critical TV rendering lag across Fire OS by **systematically troubleshooting** event handling in Vega, engineering a **50ms stroke batching queue** that reduced backlogs by **80%–95%** (from 400 to ≈ 20 msgs/sec).
- Architected scalable **REST web services** and **APIs** for subscription gating and server-side scoring logic, with **automated CI/CD pipelines** to ensure rapid release cycles and production stability.

Software Engineer Intern | Party Monster Games

Jan 2026 – July 2026

- Built real-time **WebSocket game-state synchronization** with Colyseus across TV, mobile, and server for [Trivia Party](#) and [WordRush Party](#) — top-10 ranked Fire TV apps with 10K+ monthly downloads.
- Led end-to-end **web and mobile app development** of a new game mode (**PostgreSQL** schema, **Node.js/TypeScript** backend, **React UX/UI**), driving **30% MoM MRR growth** in its first month.

Member of Technical Staff | Taipei City Government

Sep 2019 – July 2024

- Owned the full **development life cycle** of a Python geospatial remote-sensing pipeline, **designing hybrid MySQL/MongoDB data models** that eliminated legacy failures and **cut calculation time by 12%** for 1,000+ daily users.

Graduate Research Assistant (Machine Learning) | National Taiwan University

July 2017 – June 2019

- Engineered a custom **machine learning Python pipeline** for hyperspectral **image classification** using dictionary-based sparse representation. Published a peer-reviewed conference paper [[Link1](#)][[Link2](#)].

EDUCATION

San Francisco Bay University

2024 – May 2026

*M.S. in Computer Science, **Specialization in Web Programming and Data Modeling** – GPA: 3.9/4.0*

National Taiwan University

2017 – 2019

*M.S. in Civil Engineering, **Specialization in Image Processing** – GPA CS-related Class: 4.0/4.0*

- Thesis: Hyperspectral Image Classification via Integration of Joint Sparse Representation with Spectral and Spatial Information [[Link](#)]

PROJECTS

Y2k-flying-bananas (3D AI Playground) – [[Live Demo](#)][[GitHub](#)]

Jan 2026 – Feb 2026

- Built a Windows 98–styled **3D web app** with React Three Fiber, a multilingual **GPT chatbot**, and a playable Snake game; optimized rendering and **SEO** to pass Core Web Vitals.

Foodie Diary (AI Calories tracking app) – [[Live Demo](#)][[GitHub](#)]

July 2025 – Feb 2026

- Developed a **React/TypeScript** meal tracker that uses the **Gemini API** for multimodal image and text analysis, automating calorie estimation and structured macro extraction on a serverless backend.

AI Newsreader & Journalist – [[Summary](#)][[GitHub](#)]

Aug 2025 – Dec 2025

- Engineered **CI/CD pipelines (GitHub Actions / Cloud Build)** to containerize and deploy HeyGen AI video microservices to **Google Kubernetes Engine (GKE)**, with HPA for high availability.

SKILLS & COURSES

Languages: Python, JavaScript (ES6+), TypeScript, SQL, HTML/CSS; Familiar: Java

Frameworks & Tools: React, Next.js, Node.js, Express, Tailwind CSS, Three.js (R3F), Colyseus, REST/WebSockets

Databases & DevOps: PostgreSQL, MySQL, MongoDB, Docker, Kubernetes (GKE), GCP, AWS (Lambda), GitHub Actions, CI/CD

Core Skills & Coursework: Test Automation (Selenium), Cloud Computing, Data Modeling, Advanced Web Programming
