SUMMARY

Full-stack Developer (5+ years) specializing in **web application development** and **interactive 3D environments**. Expert in React, Node.js, and **automated deployment workflows (CI/CD)** for scalable LLM orchestration [[Portfolio](#)].

WORK EXPERIENCE

Software Engineer | Party Monster Games

July 2026 – Present

- Partner directly with the Founder in an **Agile environment** to take **end-to-end ownership** of [Doodle Party](#), rapidly shipping new features and overhauling the TV Hub Menu with prefetching and caching to accelerate load speed.
- **Optimize low-latency dual-screen synchronization** (TV/mobile) and low-end Fire TV hardware rendering via **real-time** stroke batching and reduced-effects rendering modes, **preventing UI lag and maintaining seamless state consistency**.
- Architect scalable subscription gating, server-side scoring logic, and **automated DevOps CI/CD pipelines** to ensure **fast release cycles** and **maintain seamless production stability** on Fire OS devices.

Software Engineer Intern | Party Monster Games

Jan 2026 – July 2026

- Architected and implemented real-time **WebSocket game state synchronization** using **Colyseus** across TV, phone, and server for [Trivia Party](#) and [WordRush Party](#) — top 10 ranked Fire TV apps with 10K+ global monthly downloads.
- Led end-to-end **web development** of a new game mode, including **RESTful APIs**, **synchronized state management**, and **frontend UX/UI** with **React**, **TypeScript**, **Node.js**, and **PostgreSQL**, driving **30% MoM MRR growth** in the first month.

Member of Technical Staff | Taipei City Government

Sep 2019 – July 2024

- Designed relational (**MySQL**) and document-based (**MongoDB**) **data models** while deploying a **Python geospatial remote sensing algorithm**, eliminating legacy failures and **cutting calculation time by 12%** for 1,000+ daily users.

Graduate Research Assistant (Machine Learning) | National Taiwan University

July 2017 – June 2019

- Engineered a custom **machine learning Python pipeline** for hyperspectral **image classification** using dictionary-based sparse representation. Published a peer-reviewed conference paper [[Link1](#)][[Link2](#)].

EDUCATION

San Francisco Bay University

2024 – Spring 2026

M.S. in Computer Science, **Specialization in Web Programming and Data Modeling** – GPA : 3.9/4.0

National Taiwan University

2017 – 2019

M.S. in Civil Engineering, **Specialization in Image Processing** – GPA CS-related Class: 4.0/4.0

- Thesis: Hyperspectral Image Classification via Integration of Joint Sparse Representation with Spectral and Spatial Information [[Link](#)]

PROJECTS

y2k-flying-bananas (3D Flying Banana Bot) – [[Live Demo](#)][[GitHub](#)]

Jan 2026 – Feb 2026

- Optimized **UX/UI** and frontend **SEO** for a Y2K-styled **3D app** using React Three Fiber (R3F), maximizing Core Web Vitals for interactive physics environments.

Foodie Diary (AI Calories tracking app) – [[Live Demo](#)][[GitHub](#)]

July 2025 – Feb 2026

- Developed a React, TypeScript meal tracker with an **AI-driven conversational interface**, leveraging a **serverless** backend architecture for scalable, cost-efficient request handling.

AI Newsreader & Journalist – [[Summary](#)][[GitHub](#)]

Aug 2025 – Dec 2025

- Built and managed **CI/CD pipelines (GitHub Actions/Cloud Build)** to automate containerization and deployment of microservices to **Google Kubernetes Engine (GKE)**, ensuring seamless updates and high availability via HPA.

SKILLS & COURSES

Languages: Python, JavaScript (ES6+), TypeScript, SQL, HTML/CSS; Familiar: Java.

Frameworks & Tools: React, Next.js, Node.js, Django, Tailwind CSS, REST/WebSockets, Three.js (R3F), Git, Pandas, NumPy.

Cloud Infrastructure: GCP, Kubernetes (GKE), AWS (Lambda), Docker, and CI/CD pipelines.

Core Skills & Coursework: Test Automation (Selenium), Cloud Computing, Data Modeling, Advanced Web Programming.
